

MENTORSHIP SERIES

What to Expect as a New Engineer

April 12, 2022 • 7-8 p.m. • Online via the Zoom Platform • Complimentary
*Speaker: **Mark Pollard**, CIE Engineer, Stellantis*

This session focuses primarily on a new engineer's transition into the company in powertrain development, product development, plant quality, supplier quality, and more. It will discuss various roles available at the company, what interest areas and engineering disciplines are best for each, and how new engineers fit best into those groups. Finally, it will also offer suggestions for students as they look to move into new positions.

Women in Engineering

April 13, 2022 • 7-8 p.m. • Online via the Zoom Platform • Complimentary
*Speaker: **Hannah Miller**, EE Systems Engineer, Stellantis*

A discussion on SWE, opportunities and initiatives for women across the company, and more.

Supplier Operations and Vehicle Quality

April 21, 2022 • 7-8 p.m. • Online via the Zoom Platform • Complimentary
*Speaker: **Yvonne Mouton**, Supplier Quality Senior Engineer, Body-In-White: Stamping and Processes, Stellantis*

A discussion on supplier quality impacts vehicle quality. Many parts in a vehicle are made and assembled by suppliers, and are crucial to improving vehicle quality. This often overlooked portion of the business is key to quality improvements! For students interested in working with both engineering and manufacturing in a unique way to ensure vehicles are successful.

A Q&A will follow each session.
